

Registration Processor Process Flow (New Registration)

**NOTE**  
\*Sanity Check of Request includes the following:  
1. Validate if Request is coming from an Authentic Source.  
2. Validate if the RID in the Packet is present in SYNC list of RIDs.  
3. Validate if the Request is not a Duplicate Request.  
4. Validate if the Packet is within the configured size.  
5. Validate if the Packet is as per the configured format/extension.
